Dr. R. Balasubramaniam, Ramesh Venkatraman**

Introduction

Any Social Sector 'development effort' boils down to effective and efficient management of projects & programs. A holistic & structured approach can significantly improve outputs & outcomes in favour of the ultimate beneficiaries. The social sector today is confronted with the challenge of doing "more-with-less" while ensuring delivery of programs within scope, budget and timelines and meeting expected quality standards. NGOs & CSOs will be evaluated by their donors or CSR funding organizations on these parameters. It is this that makes Project Management a key skill for social sector employees

About the Workshop
